

## Dedicated lift for golf course maintenance workshops

Specification	Metric	Imperial
Capacity	2500 Kg	5511.5 lbs
Lifting height (max)	1700 mm	67"
Lifting time	Up 50 s; down 48 s	Up 50 s; down 48 s
Motor	2.2 kW	2.95 HP
Power	240 V	240 V
Wheelbase range	1070 mm to 2000 mm	42.1" to 78.7"
Wheel track range)	1250 mm to 2500 mm	49.21" to 98.4"
Overall height	2770 mm	109.1"
Overall width	3600 mm	141.7"

- Proven 2-column design
- Full width rear tray – no adjustment of set up required
- Adjustable width front wheel forks – accommodates wide range of mower tractors and vehicles providing open access
- Easy operation – single point button to raise lift and lever to lower, can be gravity lowered without electrical power
- Lifts equipment from Toro Greensmaster 3050 to Jacobsen HR 9016 turbo and Toro Groundsmaster 4700D
- Electro-hydraulic drive to guarantee low noise, long life, low absorption of power, high reliability, easy maintenance and quick installation
- Independent mechanical safety locks in each column
- Hydraulic relief valve protects lift from being overloaded
- Super-glide guide system – self-lubricating, smooth lifting action for low maintenance
- Automatic raising synchro with the dual hydraulic cylinders.
- No overhead beam obstruction – no need to remove canopies from vehicles
